

CAPABILITY STATEMENT

Technology, data and educational consultancy for practical change.

QCD Consulting helps organisations improve performance through technology solutions, data analytics and educational consultancy. We support schools, educational organisations and businesses with software development, reporting systems, assessment strategy, educational technology and evidence-informed improvement.

QCD Consulting

Education · Science · Technology

Technology Solutions

Custom software, automation and digital transformation.

Data Analytics

Business intelligence, dashboards and reporting.

Educational Consultancy

Assessment, improvement and educational technology.

ABOUT QCD CONSULTING

A consultancy built at the intersection of education, technology and data.

QCD Consulting was founded to help organisations solve complex challenges through practical solutions. Rather than offering generic advice, we combine strategic thinking with technical expertise and real-world implementation experience.

Our work spans educational consultancy, software development, business intelligence and digital transformation. Whether supporting schools with assessment strategy, developing custom software or building reporting systems, our focus remains the same: creating solutions that deliver measurable value.

WHAT MAKES US DIFFERENT

Many consultancies focus solely on recommendations. QCD Consulting combines consultancy, technology and implementation expertise to help organisations move from ideas to outcomes.

Practical experience

Software delivery, analytics, education, business improvement and operational efficiency.

Product innovation

Hands-on experience designing and building educational technology platforms.

WHY QCD CONSULTING

Technology expertise

Data analytics capability

Educational sector experience

Software product development

Practical implementation support

Evidence-informed approach

SERVICES

Three specialist areas. One practical approach.

QCD Consulting works with organisations that want to improve how they operate, make decisions and use technology. Our services can be delivered as targeted advisory support, end-to-end project delivery or a flexible partnership that evolves with your organisation.

01

Technology Solutions

Custom software development, workflow automation, SaaS product development, integrations, internal systems, client portals and process improvement.

02

Data Analytics

KPI dashboards, business intelligence, automated reporting, educational analytics, performance monitoring and data-driven decision support.

03

Educational Consultancy

Assessment frameworks, student progress tracking, intervention planning, school improvement, educational technology and reporting strategy.

WHY IT MATTERS

Technology should clarify, not complicate.

We help organisations replace disconnected systems, repetitive manual work and unclear reporting with practical solutions that improve visibility, efficiency and confidence in decision-making.

PRODUCTS

Technology developed by QCD Consulting.

Our consultancy work is strengthened by hands-on experience designing and building software products for the education sector. This gives our advice practical depth because we understand the realities of product design, implementation, adoption and long-term improvement.

MasteryByte

Assessment and progress tracking software designed to help educational organisations gain better visibility of learner performance and development.

Key areas

Assessment management · Progress tracking · Reporting dashboards · Educational analytics · Data-informed interventions

masterybyte.com

Schoolise

A next-generation school management platform bringing learning, administration, communication and reporting together in one connected ecosystem.

Key areas

Learning management · Admissions · Smart scheduling · Communications · Safeguarding · Reporting · Mobile access

REPRESENTATIVE PROJECTS

Examples of the challenges we help solve.

The examples below are representative scenarios based on the types of challenges QCD Consulting helps organisations solve.

Secondary School Assessment Visibility

A school relies on spreadsheets to manage assessments and track learner progress. QCD Consulting designs a centralised assessment and reporting approach with leadership dashboards, progress monitoring and automated reporting.

Services: Educational Consultancy · Data Analytics · Technology

SME Reporting Dashboard

A growing business has data across multiple systems but lacks meaningful reporting. We develop a business intelligence dashboard that brings sales, operational and financial data into a single source of truth.

Services: Data Analytics · Technology Solutions

Workflow Automation

An organisation relies on manual approvals and email-based processes. A custom workflow system automates notifications, approvals and record keeping, reducing delays and improving visibility.

Services: Technology Solutions

Trust Data Strategy

A multi-school organisation needs a consistent approach to analysing attainment and progress. We design a reporting framework and analytics dashboards to standardise performance reporting.

Services: Educational Consultancy · Data Analytics

Educational Technology Review

A school is using disconnected systems for communication, assessment and administration. We review the current setup and create a roadmap to reduce duplication and improve reporting.

Services: Educational Consultancy · Technology

Learner Progress Analytics

A training provider wants greater visibility into learner engagement and achievement. Custom analytics dashboards help identify trends, monitor interventions and improve reporting.

Services: Data Analytics · Educational Consultancy

OUR APPROACH

A structured process focused on results.

01

Understand

Clarify objectives, challenges, stakeholders and the outcomes that matter.

02

Analyse

Review systems, processes and available data to identify opportunities.

03

Design

Develop practical recommendations, strategies and solutions.

04

Deliver

Support implementation and measure success against agreed outcomes.

GET IN TOUCH

Ready to explore what is possible?

Whether you need technology solutions, analytics expertise or educational consultancy, QCD Consulting can help identify opportunities and deliver practical results.
